

Karel is an IT security professional that attained his CISSP in 2002 whilst in the employ of Dimension Data Security in Cape Town. He has worked as a freelance security consultant, defining Identity and Access Management principles, policies and architecture for a large financial services organization, deployed perimeter security controls for a number of retail, financial, chemical companies and education organizations.

He is employed by RSA, the Security Division of EMC2, as a Principal Consultant for the security practice to develop the RSA business unit in SECA and performs this function in a presales and consulting role. His main focus areas are identity verification, anti-fraud services, security information and event management and data loss prevention.

Karel serves as one of the directors of the Internet Security Group of Africa. He has been instrumental in starting a remote chapter for the ISG in Nigeria and had provided inputs for the establishment of a Computer Security Incident Response Team in South Africa.

Karel has spoken at the Middle East IT Security Conference in Sharjah, UAE late in 2007 and most recently chaired the African National Security Conference in Sandton, Johannesburg and has published various works and opinion pieces in the local IT media sector. He is a keen Laser and J22 sailor and armchair sports fan.
